

# Trees and Overhead Wires

Please be aware that recent power cuts in Lower Heyford have been entirely due to trees coming into contact with overhead wires and causing a short circuit. SSE are aware of this problem and have attempted to contact owners of properties where overhanging trees are causing problems.

**SSE have, however, been refused entry to some properties**

SSE will carry out the work at **no charge** to the home owners to ensure that power outages do not occur in the future.

Please allow SSE access to your property if requested.

Thank you

*Lower Heyford Parish Council*
